

# Restoration Processes

**Excite your customers with something unexpected by offering them an innovative alternative to floor replacement.** Our tile & grout restoration processes are perfect for clients who want to keep the original design of their floors, but can't maintain its aesthetic appeal with regular cleaning and maintenance.

When you become a SaniGLAZE Franchisee you will be professionally trained and certified to perform all SaniGLAZE restoration processes.

## **Make Grout Great Again**

Your customers' floors will look like the day they were installed. Our proprietary grout coatings are durable, non-porous, and available in a variety of colors.

## **Longer Lasting Clean**

Wow them with an enhanced appearance that is easy to maintain. SaniGLAZE restoration processes improve the effectiveness and efficiency of routine cleaning, helping extend the life of their floor.

## **A Healthier Environment**

Give them peace of mind. Our processes are designed to remove harmful bacteria that cause foul odors and prevent them from returning. You can also improve the safety by increasing the traction in areas prone to slip and falls.
